E.26	Right of withdrawal	Not publicly available information	Free alphanumerical text
E.27	Transfer of purchased crypto-assets	**1. Transfer from Centralised Exchanges (CEX) to Wallet:** ● **Login to Exchange Account**: Access your account on the centralised exchange where the crypto-assets (e.g., DOGINME tokens) were purchased. ● **Navigate to Withdraw Section**: Go to the "Funds," "Wallet," or "Withdraw" section of the exchange interface. ● **Select Asset to Transfer**: Choose the asset (e.g., DOGINME tokens) you wish to transfer and select "Withdraw" or "Send." ● **Enter Withdrawal Address**: Provide the recipient address (i.e., your own non-custodial wallet address). This should be a valid address that supports the token (ERC-20 address for DOGINME tokens, for example). ● **Specify Amount**: Input the number of tokens you wish to transfer. ● **Confirm the Transfer**: Verify the transaction details and submit the request. The exchange may require additional security, such as two-factor authentication (2FA) or email confirmation. ● **Monitor the Transfer**: The crypto-assets will be sent to the provided wallet address. You can monitor the transaction on a blockchain	Free alphanumerical text

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
		explorer using the transaction hash. 2. **Considerations for Transfers:** ● **Address Accuracy**: Double-check the recipient address to ensure no mistakes are made. ● **Network Fees**: Transfers on Ethereum-based networks (like DOGINME tokens) often require gas fees, which fluctuate depending on network congestion. Ensure your wallet has enough ETH for gas fees. ● **Network Conditions**: The time it takes for a transfer to complete may vary depending on network congestion.	
E.28	Transfer time schedule	Not applicable	ISO 8601 date format (YYYY-MM-DD)
E.29	Purchaser's technical requirements	**Digital Wallet**: **Compatible Wallet**: Purchasers must use a wallet compatible with the token's blockchain (**Wallet Setup**: The wallet should be properly configured and secured with a strong password and backup phrase (seed phrase). Wallets must also support the specific token type (e.g., ERC-20 for DOGINME tokens). **Gas Fees**: For tokens based on Ethereum or Ethereum-compatible networks, purchasers must have ETH; or SOL (depending on the preferred blockchain) in their wallet to cover transaction (gas) fees. Gas fees are required for:	Free alphanumerical text

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
		● Transferring tokens ● Interacting with smart contracts **Gas Fees Vary**: The amount required will vary depending on network congestion, transaction complexity, and the platform used. Make sure to have enough ETH or SOL in your wallet to ensure successful transactions. **Exchange Account (if applicable)**: **Centralised Exchange (CEX)**: If purchasing through centralised exchanges, an account is required. **KYC Verification**: Some exchanges may require Know Your Customer (KYC) verification before allowing trades, deposits, or withdrawals. Ensure that you complete the necessary identity verification to access full platform features. **Internet Connection:** A stable internet connection is necessary for wallet access and transactions on exchanges or decentralised platforms. **Software/Browser Requirements**: ● **Browser Extensions**: For wallets you will need to install browser extensions for supported browsers. ● **Software**: Some wallets or platforms may have desktop applications that users will need to download and install. **Security Measures**: ● **Private Key Management**: Purchasers are responsible for their wallet's private keys or seed phrase. If lost, recovery of funds may not be possible. It's essential	

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
		to store your keys or phrases securely and never share them. ● **Two-Factor Authentication (2FA)**: When using exchanges or centralised platforms, enable 2FA for added security. **Smart Contract Approval**: For some transactions (such as staking or trading), wallet approval may be required. Always check contract details and make sure you're interacting with trusted smart contracts. **Internet Connection** ● Stable internet required for transactions and wallet syncing **Fiat Payment Method** ● Supported payment methods to fund your purchase: ○ Apple Pay ○ Credit/Debit Cards (Visa, Mastercard, etc.) ○ PayPal (where supported) ○ Bank transfers (depending on region) ● A valid billing address and identity verification (KYC) may be required depending on jurisdiction. **Supported Networks** ● Ethereum (ERC-20 tokens) ● Base Layer-2 network (Ethereum scaling solution)	

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
		Gas Fees ● You'll need native tokens (ETH for Ethereum/Base) to pay transaction gas fees when swapping tokens.

Part G - Information on the rights and obligations attached to the crypto-assets			
G.1	Purchaser rights and obligations	Purchasers of the DOGINME token do not acquire any governance rights or enforceable obligations.	Free alphanumerical text
G.2	Exercise of rights and obligations	Not applicable	Free alphanumerical text
G.3	Conditions for modifications of rights and obligations	This is a community-based crypto asset, so would be determined by community consensus.	Free alphanumerical text
G.4	Future public offers	Not applicable	Free alphanumerical text
G.5	Issuer retained crypto-assets	Not publicly available	Numerical {INTEGER-n}
G.6	Utility token classification	true	‘true’ – Yes ‘false’ – No
G.7	Key features of goods/services of utility tokens	See D.7.	Free alphanumerical text
G.8	Utility tokens redemption	No redemption mechanism	Free alphanumerical text
G.9	Non-trading request	false	‘true’ – sought ‘false’ – not sought
G.10	Crypto-assets purchase or sale modalities	DOGINME tokens can be purchased and sold via centralised exchanges using common	Free alphanumerical text

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
		trading pairs such as DOGINME/ETH. DOGINME is also available on decentralised platforms through its use of Base Layer 2, which relies on Ethereum.	
G.11	Crypto-assets transfer restrictions	There are no specific transfer restrictions at the token level for DOGINME tokens. The token is fully transferable on the Ethereum blockchain and holders can freely send or receive it between compatible wallets. However, DOGINME tokens may be subject to certain transfer restrictions imposed by exchange platforms to comply with legal, regulatory, and operational requirements. These restrictions aim to ensure compliance with relevant anti-money laundering (AML), know-your-customer (KYC), and sanction-related laws. **Jurisdictional Restrictions** DOGINME tokens cannot be transferred or sold to individuals or entities located in jurisdictions subject to sanctions or where the transfer or trading of crypto-assets is restricted under applicable laws and regulations. **Exchange-Imposed Restrictions** Transfers of DOGINME tokens may be restricted or blocked when conducted through centralised exchanges if the purchaser's identity cannot be verified in accordance with the exchange’s AML/KYC procedures. Transactions involving unverified users may be limited, blocked, or reversed to ensure compliance with anti-money laundering (AML) and counter-terrorism financing (CTF)	Free alphanumerical text

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
		regulations. **Decentralised Transfers** It should be noted that decentralised exchanges generally allow unrestricted peer-to-peer transfers. However, users are individually responsible for ensuring compliance with applicable laws and regulations when using these platforms.	
G.12	Supply adjustment protocols	false	'true' – Yes 'false' – No
G.13	Supply adjustment mechanisms	Not applicable	Free alphanumerical text

G.15	Token value protection schemes description	Not applicable	Free alphanumerical text
G.16	Compensation schemes	false	'true' – Yes 'false' – No
G.17	Compensation schemes description	Not applicable	Free alphanumerical text
G.18	Applicable law	Not publicly available	Drop-down list of applicable laws
G.19	Competent court	Not publicly available	Free alphanumerical text
Part H – information on the underlying technology			
H.1	Distributed ledger technology (DTL)	Distributed Ledger Technology (DLT) refers to a decentralised digital infrastructure used for recording transactions across multiple	Free alphanumerical text

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
		locations simultaneously. Unlike traditional, centralised databases, DLT systems operate without a central authority, relying instead on a network of independent nodes, each maintaining a synchronised copy of the ledger. Transactions are validated through consensus mechanisms, promoting transparency, security, and resistance to tampering. One of the most widely adopted forms of DLT is blockchain, which consists of sequentially linked blocks containing timestamped transaction data. Each block is cryptographically connected to the previous one, making it virtually immutable and resistant to retroactive alteration. Blockchains can also support smart contracts, self-executing agreements that automate processes and enforce rules without intermediaries, thereby increasing trust and efficiency in decentralised systems. Blockchain-based DLT enhances transparency, consumer choice, and interoperability within the broader digital economy. Users can inspect open-source blockchain code, independently verify data integrity, and choose platforms that align with their preferences. The permissionless nature of public blockchains promotes seamless integration and innovation across applications, wallets, and services.	
H.2	Protocols and technical standards	**Primary Network: Base** The DOGINME token primarily operates on the Base blockchain, a Layer 2 blockchain built on top of Ethereum, leveraging its mature	Free alphanumerical text

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
		and decentralised infrastructure. **DLT Type: Blockchain** DOGINME is an ERC-20 token functioning within the Base blockchain environment. It follows the established ERC-20 standard, ensuring compatibility with a broad range of Ethereum wallets, DeFi protocols, and decentralised applications (dApps). **Consensus Mechanism: Proof of Stake (PoS)** The DOGINME token inherits Ethereum's Proof of Stake (PoS) consensus model through its Base blockchain for underlying transaction validation and smart contract operations. **Token Standard: ERC-20** DOGINME conforms to the ERC-20 token standard, allowing for seamless integration with Ethereum-native tools, wallets, dApps, and decentralised exchanges. This ensures ease of use for token holders and supports broad utility across the Ethereum ecosystem. **BASE** DOGINME is available on the BASE network built on Ethereum, which is known to use PoS (Proof of Stake) for its consensus mechanisms. It generates blocks through validators based on staking. Base is an Ethereum Layer 2 (L2) blockchain. Base is compatible with Ethereum's broader ecosystem, allowing seamless transfer of assets and data across L2 networks.	
H.3	Technology used	DOGINME is deployed on Base Layer 2	Free alphanumerical text

		network, compatible with Ethereum's blockchain infrastructure, ensuring decentralization, security, and scalability.	
H.4	Consensus mechanism	The DOGINME token inherits Ethereum's Proof of Stake (PoS) consensus model for underlying transaction validation and smart contract operations through its Base L2 network. This model supports high security, decentralisation, and energy efficiency.	Free alphanumerical text
H.5	Incentive mechanisms and applicable fees	**Transaction FeesL:** On-Chain: ● Gas Fees: Standard gas fees apply when transferring DOGINME. Fees vary based on network congestion. Decentralised Exchange (DEX) Fees : ● Swap Fees: Typically range from 0.25% to 0.30%, depending on the DEX and liquidity pool. Centralised Exchange (CEX) Fees : ● Trading Fees: Vary by platform, commonly between 0.1% and 0.5%. ● Withdrawal Fees: Charged when withdrawing DOGINME to external wallets; the amount depends on the platform. ● Fiat Conversion Fees: May apply when converting between fiat currencies and crypto via supported platforms.	Free alphanumerical text

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
H.6	Use of distributed ledger technology	false	‘true’ – Yes, DLT operated by the issuer or a third-party acting on the issuer’s behalf ‘false’ – No, DLT not operated by the issuer or a third-party acting on the issuer’s behalf
H.7	DLT functionality description	DLT is a digital system for recording transactions in which the transactions and their details are recorded in multiple places at the same time. Unlike traditional databases, distributed ledgers have no central data store or administration functionality. Instead, the ledger is decentralised, and consensus on the transactions is achieved through a process that involves multiple nodes, each maintaining its own copy of the ledger. The benefits of DLT include increased transparency, enhanced security, improved traceability, and greater efficiency of transactions.	Free alphanumerical text
H.8	Audit	false	‘true’ – Yes ‘false’ – No
H.9	Audit outcome	Not applicable	Free alphanumerical text
Part I – Information on risks			
I.1	Offer-related risks	The offering and trading of DOGINME tokens involve a number of risks typical of the wider crypto-asset market, particularly within centralised exchange environments, liquidity provision platforms, and multi-chain DeFi ecosystems. **Market Volatility** The value of DOGINME tokens may	Free alphanumerical text

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
		experience high levels of volatility due to market sentiment, macroeconomic factors, exchange activity, or protocol-related news. These fluctuations could result in financial losses for token holders or short-term traders. **Liquidity Risk** There is no assurance that DOGINME will maintain deep liquidity or high trading volumes across supported exchanges. Liquidity may be influenced by trading activity on DOGINME and partner exchanges, token distribution patterns, or changes in market demand, which could make it more difficult to enter or exit positions efficiently. **Regulatory Risk** As regulations around centralised exchanges and crypto-asset trading continue to evolve globally, DOGINME may be subject to new or unforeseen legal and compliance obligations. Such changes could impact exchange access, token functionality, or availability in specific jurisdictions. **AML/KYC Compliance** Purchasing or trading DOGINME via centralised platforms typically requires identity verification in accordance with anti-money laundering (AML) and know-your-customer (KYC) standards. Users who do not comply may face restricted access, account limitations, or full service denial based on local legal requirements. **Market Manipulation** As with many publicly traded digital assets, DOGINME may be exposed to speculative behaviour or manipulative practices including pump-and-dump schemes, wash trading, or spoofing. Such activity may distort fair price	

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
		discovery and increase volatility. **Token Utility Risk** The value and usability of DOGINME depend on the successful development and adoption of the DOGINME community. Also important is the public perception related to the ‘dog in me’ meme and Dan Romero’s public perception, as he is a key figure at the centre of the DOGINME community meme culture.	
I.2	Issuer-related risks	As a community meme project, the value and usability of DOGINME depend on the successful development and adoption of the DOGINME community. Also important is the public perception related to the ‘dog in me’ meme and Dan Romero’s public perception, as he is a key figure at the centre of the DOGINME community meme culture.	Free alphanumerical text
I.3	Crypto-assets-related risks	**Custodial Risk** Crypto-assets such as DOGINME are bearer instruments. If a user loses access to their private key or recovery phrase, there is no recourse for recovery. The issuer cannot restore lost access or reissue tokens. **Blockchain Dependency** DOGINME tokens operate on the Base chain, exposing them to blockchain-specific risks, such as: ● Network congestion or elevated gas fees ● Smart contract risks (on Ethereum-based implementations) ● Delays or failures during transfers or platform integration Potential forks or protocol-level changes	Free alphanumerical text

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
I.4	Project implementation-related risks	**Technical Limitations** New product features, liquidity strategies, or integrations may be delayed or limited by technical hurdles, resource constraints, or unanticipated security flaws. **Regulatory Developments** Increasing scrutiny of centralised platforms may result in the need for protocol restructuring, jurisdictional restrictions, or more extensive reporting obligations.	Free alphanumerical text
I.5	Technology-related risks	**Network Disruptions** Delays or failures on a blockchain network could affect token transfers. Risks include block delays, consensus issues, and fork-related bugs. **DEX Integration Risks** Using DOGINME on decentralised exchanges may expose users to: • Price slippage • Front-running by bots • Interface issues or approval errors • Liquidity manipulation or shallow pools.	Free alphanumerical text
I.6	Mitigation measures	**Exchange Listings** DOGINME is listed on several centralised and operates on Base, reliant on Ethereal’s decentralised system, supporting liquidity and market access.	Free alphanumerical text
Part J – Information on the sustainability indicators in relation to adverse impact on the climate and other environment-related adverse impacts			

No	FIELD	CONTENT TO BE REPORTED	FORM AND STANDARDS TO BE USED FOR REPORTING
J.1	Adverse impacts on climate and other environment- related adverse impacts	**Low Environmental Impact (PoS-Based)** DOGINME tokens operate on Proof of Stake (PoS) chains through its Base Layer 2 reliance, resulting in significantly lower energy usage compared to Proof of Work (PoW) blockchains. **Environmental Policy Status** At present, DOGINME has not adopted a formal sustainability policy. However, by building on energy-efficient networks, the environmental impact of token operations remains relatively low.	Free alphanumerical text
